

## August is: National Immunization Awareness Month

Three important things you should know:

1. Adults need to get shots (vaccines) just like kids do. Make sure you are up-to-date on your shots.
2. ALL Health+ plans cover more than 10 Adult vaccinations for FREE under preventative care services.
3. Being immunized doesn't just protect you – it also protects the people around you. Some people in your family or community may not be able to get certain vaccines because of their age or health condition.

Visit [www.provider.bcbs.com](http://www.provider.bcbs.com) or call 888-222-9206 to find a provider near you.
